

EPPS 6354 FMP PARTICIPANT MANAGEMENT SYSTEM

BY JANNELLE NAVALES

WHAT IS FMP?

The **Freshman Mentor Program** is a program offered by the **Office of Undergraduate Education** at the University at Texas at Dallas to connect incoming first-time-in-college students with upperclassmen who have volunteered to serve as mentors.

Mentors and mentees must go through a **multi-step application process**. Currently, FMP staff stores data for each step across different **Excel spreadsheets** in **Box**, our cloud system.

WHY THIS PROJECT?

Purpose

The purpose of creating this project will allow for Freshman Mentor Program staff to easily look up and manage participants.

Users will be able to filter participants by individual attributes, as well as easily identify mentor and mentee pairs without viewing excessive information.

if time permits, a geography feature will allow users to see the distribution of participants, which can be used to inform the program's budding initiative in marketing to different high schools in the area.

Functions

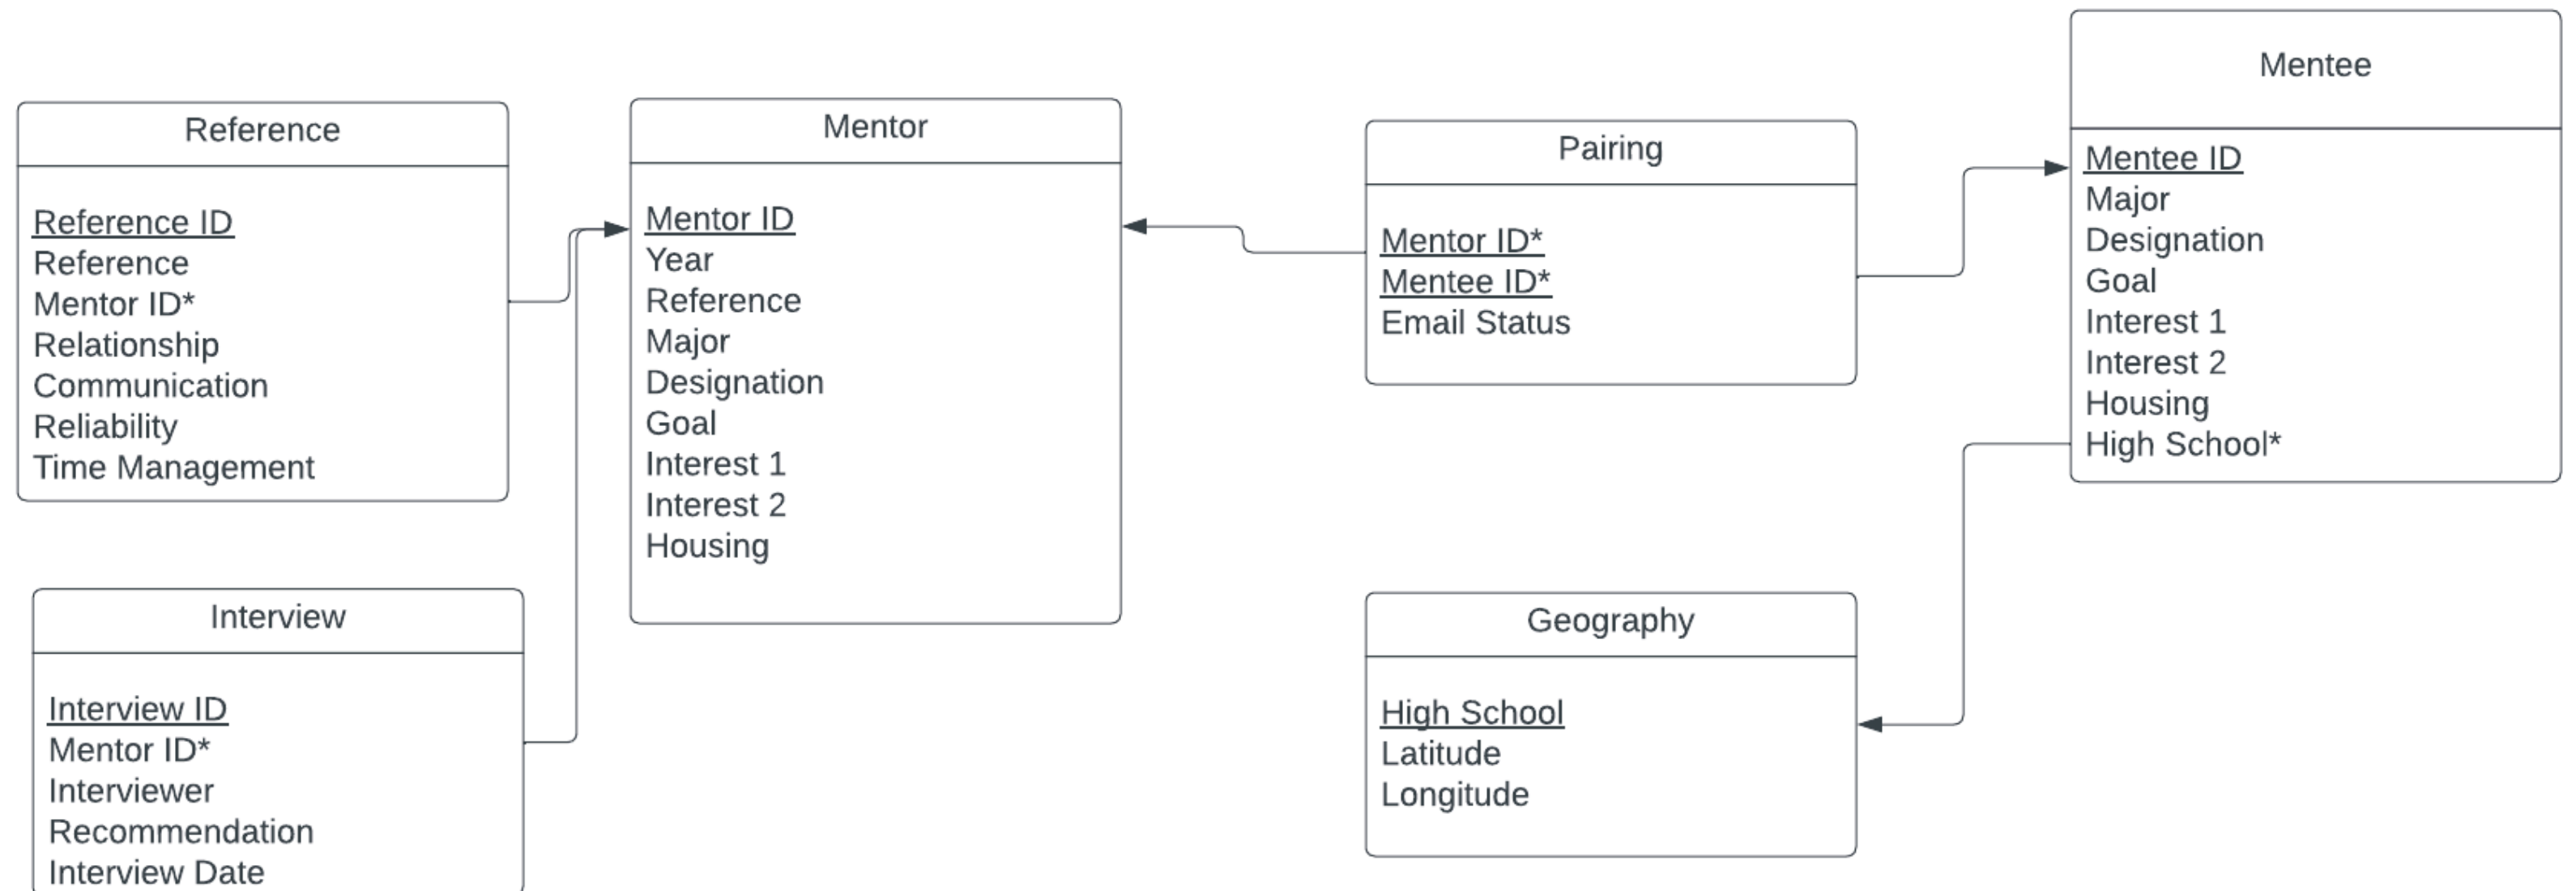

PRIVACY

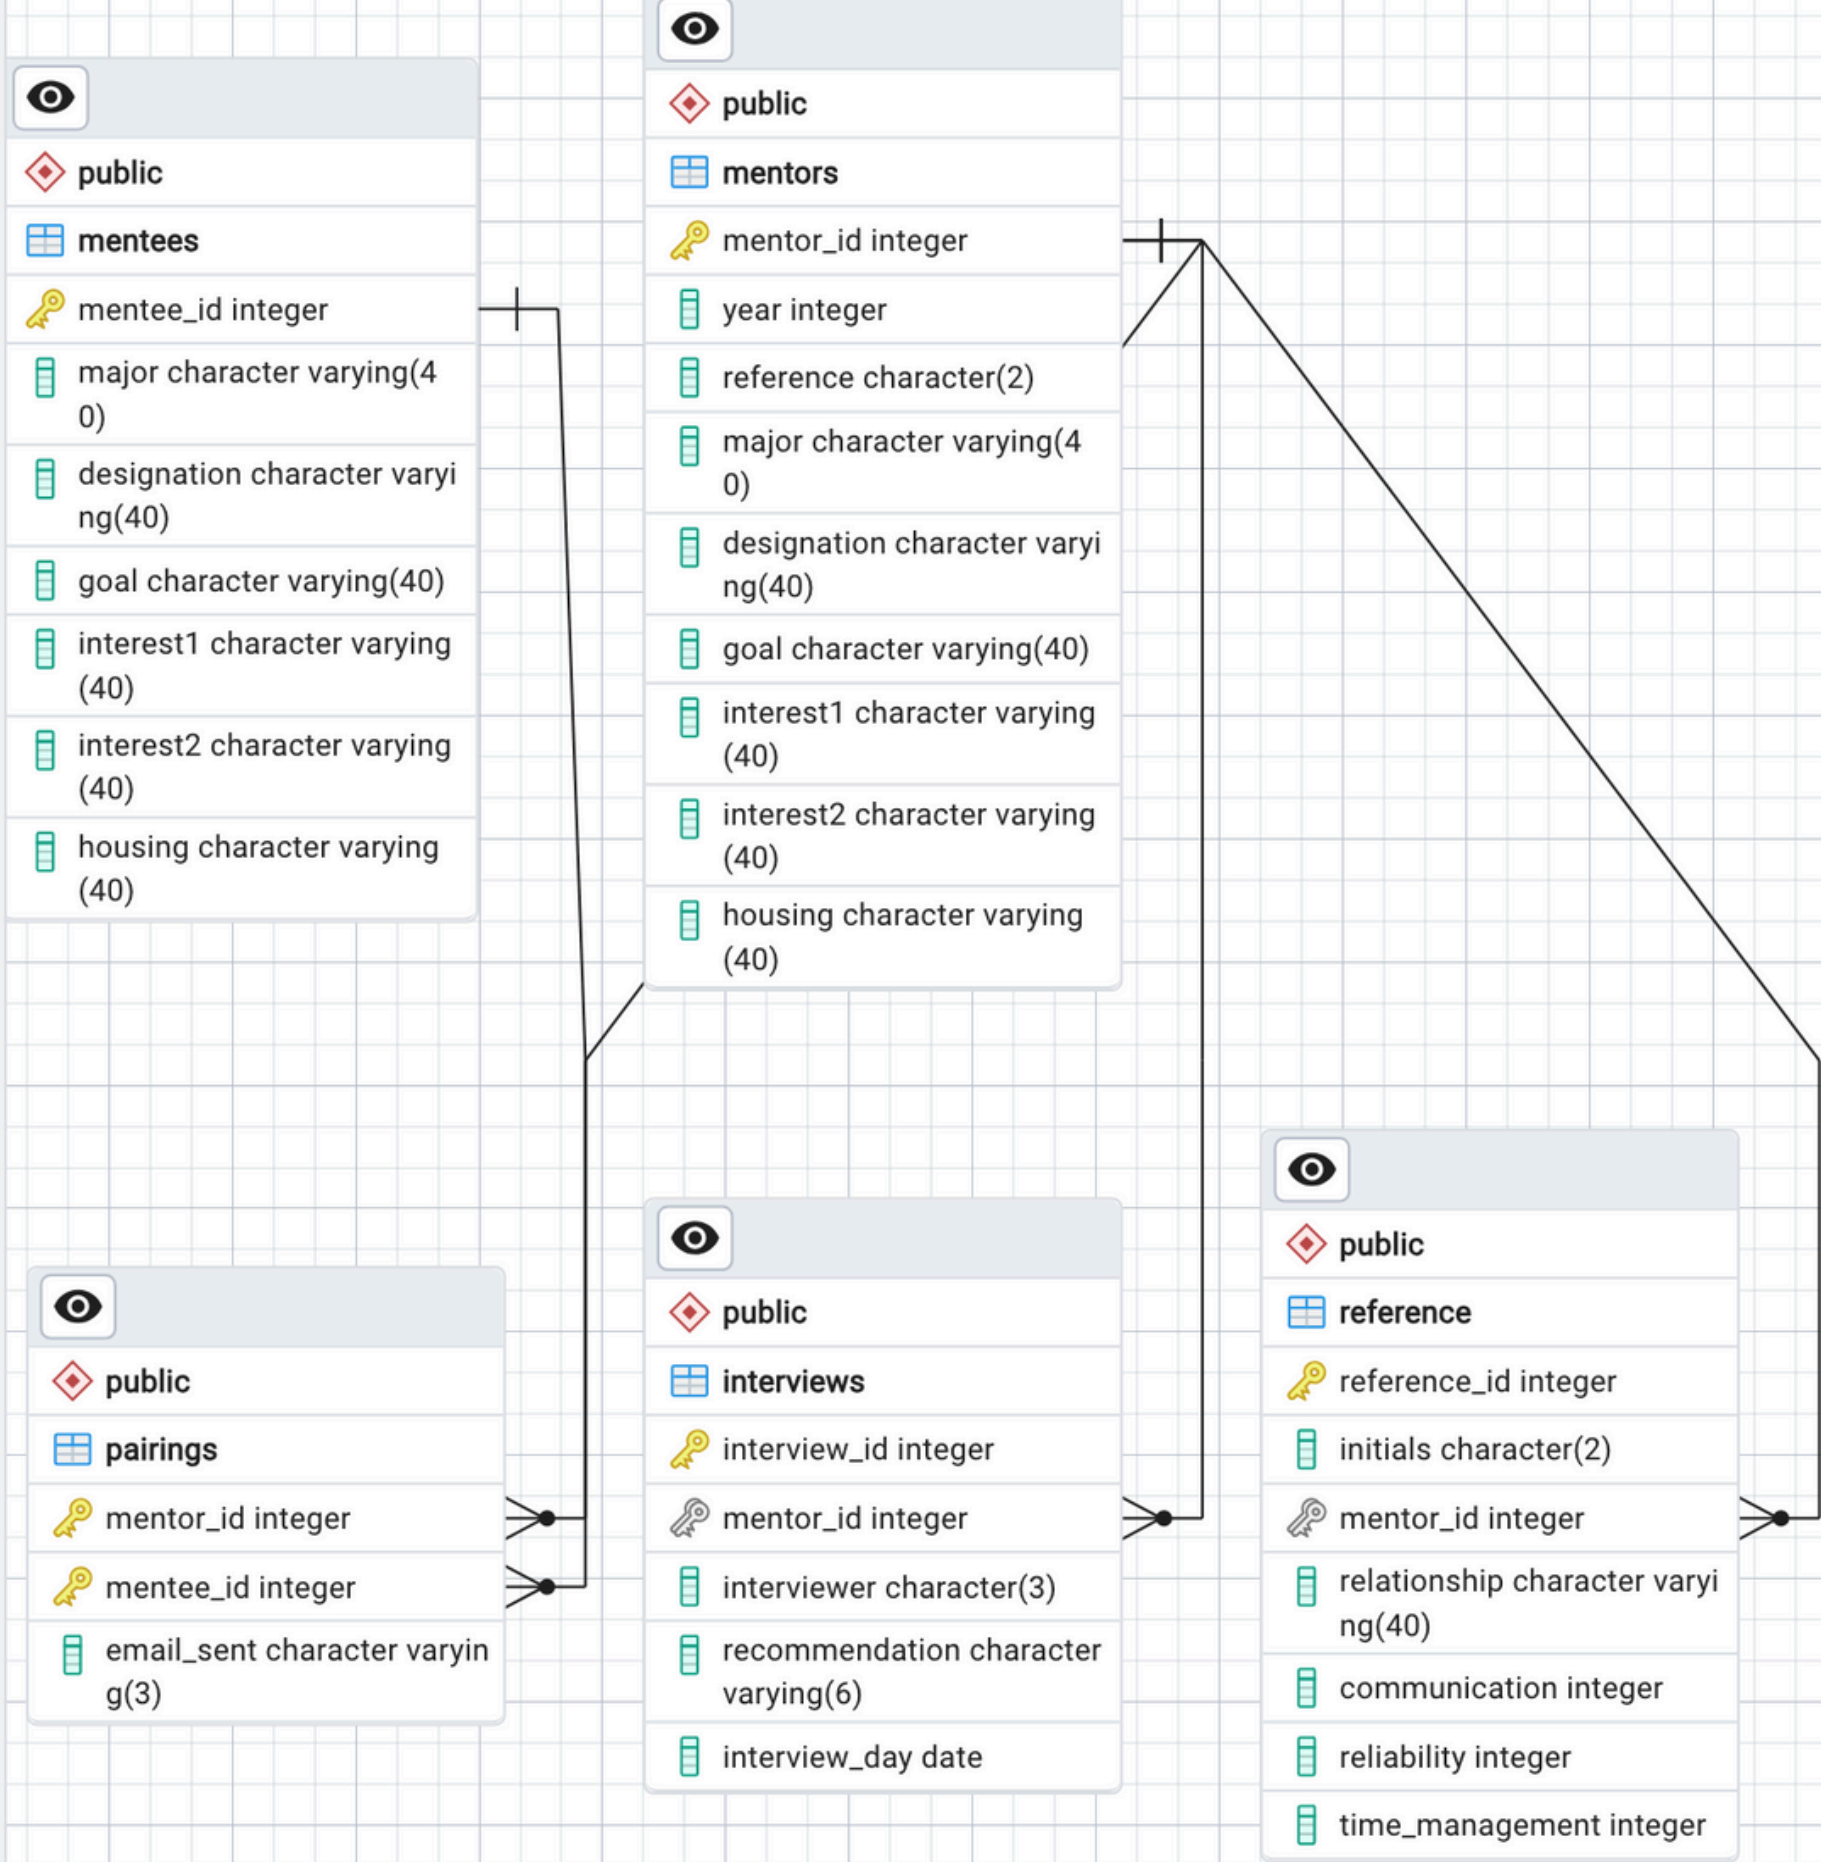

- **Mentor and mentee names** are changed to a **4-digit identifying number**.
- **References'** names are changed to a 2 initials (do not reflect the names of actual references)
- **Interviewers'** initials were changed to randomized initials (do not reflect actual references)
- Upon closer look at FERPA, I am not able to display the **names of previous schools**
